**IN THE INTEREST OF SAFETY ON THE ROADS
WE ARE BRINGING THE FOLLOWING TO YOUR NOTICE!**

These are the Quality and Standards that all Hydraulic Brake Rubbers have to comply with. SABS inspectors are already on the road doing inspections in spares shops that sells brake repair kits. The rubbers that are used or found in any brake cylinder also have to comply with these standards.

Please make sure that the brake rubber components you are selling comply, as you could be fined if contravening these requirements.

Wingate is proud to advise all our customers that all brake rubbers and cylinders we distribute have always complied with the International Standards Organisation (ISO) requirements and we have certification as proof of compliance. Our tests have been done by independent international laboratory's in the U.S.A.

Don't forget to ask your supplier of kits and cylinders for their Certified letter of compliance for your own protection.

NEWS FLASH

Wingate has introduced a new range of Brake & Clutch Cylinders for:

- Off road equipment
- Heavy Commercial
- Light Commercial
- Passenger Vehicles
